

### **POLLINATOR AND CONSERVATION SEED MIXES AVAILABLE THROUGH SWCD OFFICE**

The White County Soil and Water Conservation District continues its partnership with Quail / Pheasants Forever to provide pollinator and other conservation seed mixes to assist landowners in fulfilling their contracts and improving habitats.

Quail / Pheasants Forever works with regional seed growers to provide wildlife habitat seed mixtures that meet or exceed the requirements in your contract. Seed is sold at a very competitive cost and is ordered at the local soil and water conservation district office. Quail / Pheasants Forever ships your pre-mixed seed to the SWCD office where it is distributed. Orders can be divided by field acres to ensure the proper amount of seed is planted on each field. Payment is due when order is placed, and seed should be available for pickup in 1-2 weeks. Please call the White County SWCD office at 618-382-2213, Ext. 3, for additional information or place an order.
